Automation

Boilerplates are available for full customization

Simply pick the best **AI/ML** for your business

API level integration with Low-code Python (LCPy)

- It is genuinely Python but low-code
- All AI/ML solutions provide API sample code in Python
- The AI/ML solution of your choice appear in LCPy in no time

Speed of technological advancement: "ditch and switch"

- Minimize initial investment (time/money) for deployment
- No mid- or long-term commitment to any one solution
- Pick the best solution today, then switch to a better one tomorrow
